Creating Solutions
to the Worlds
Housing Needs

A Problem.....

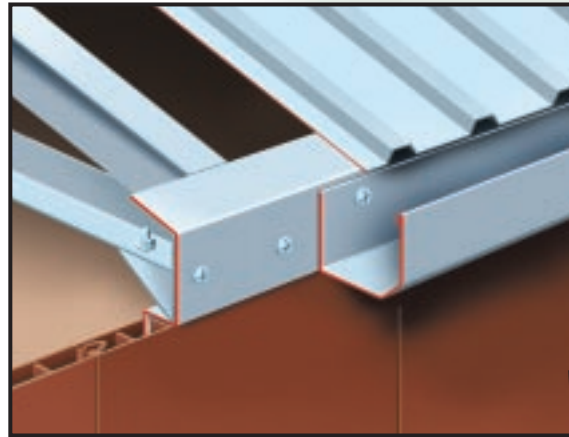

According to the UN Centre for Human Settlement at least 600 million people in the urban areas of Asia, Africa and Latin America occupy housing of such poor quality and with such inadequate provision for water, sanitation and drainage that their lives and health are under continuous threat.

The World Health Organisation (WHO) estimates that 12 million children die each year from easily preventable or curable diseases. Improving general living standards (especially better sanitation) would make a massive dent into the 12 million deaths.

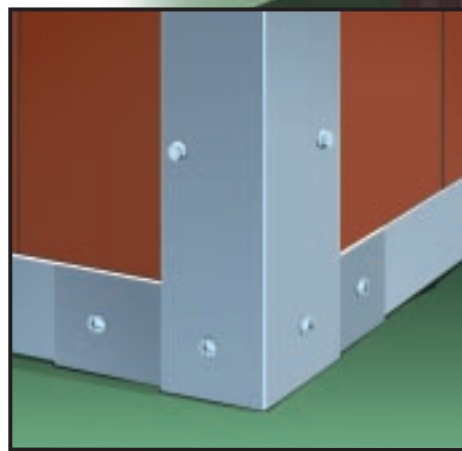

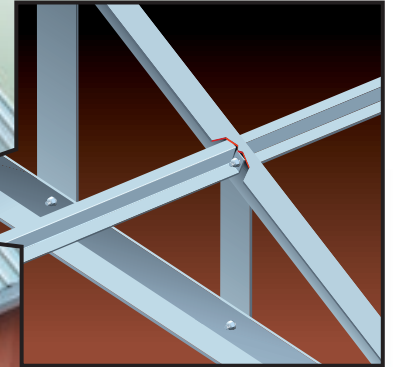

The South Africa Development Community (SADC) Regional Conference on Social Development highlighted that housing is a basic social need after food and clothing. Adequate housing, it said, is a pre-requisite to national socio-economic development.

We have a solution.....

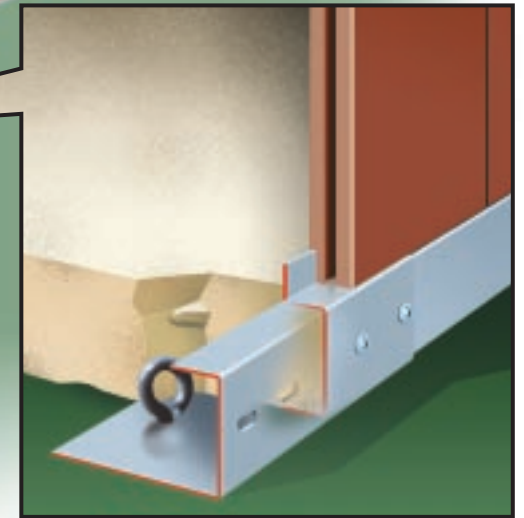

.....and a Safe, Clean Solution

- Inexpensive
- Made from Recycled Plastic
- Modular Design
- Maintenance Free

- Flat Packed
- Weather Resistant
- Treated with **EC ENVIROCARE™** to eradicate Bacteria, Viruses, Funghi/Yeasts, Algae etc

Create.....

.....a Community

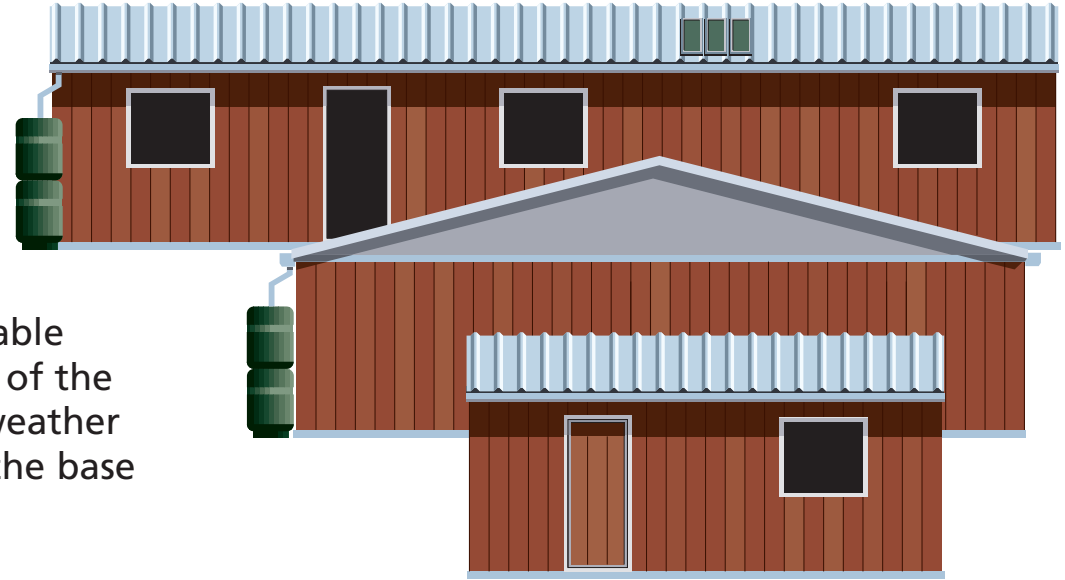

Design.....

Modular units

The design of the galvanised steel framework in 2 metre lengths enables additional modules to be added very simply to create any size.

The recycled plastic boards, which are available in a variety of colours, are impregnated with Enviro-Care creating constant protection from bacteria and viruses capable of spreading disease. These boards are a fundamental part of the units and are utilised in such a way to stand up to severe weather conditions, incorporated with integral fixing plates round the base of the units ensuring secure foundations.

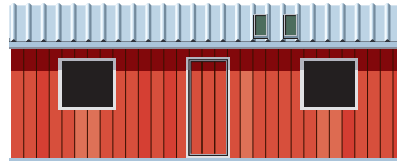

Colours available

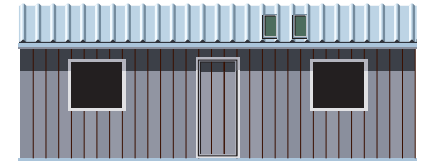

Blue

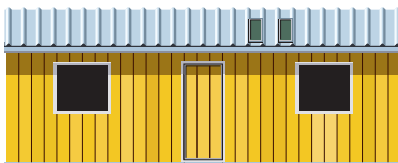

Red

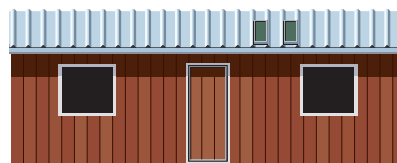

Grey

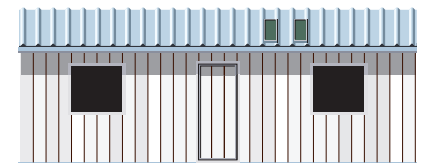

Yellow

Brown

White

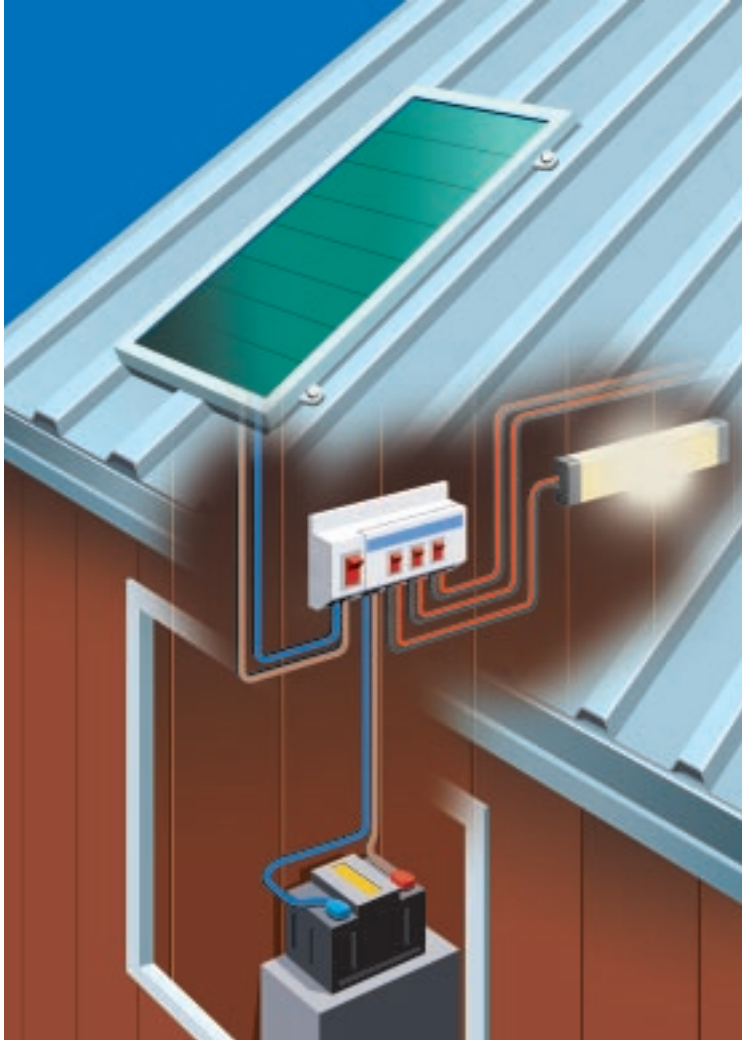

Houses can be supplied with various roofing styles and colours or it can be sourced from local resources.

.....for Ease & Safety

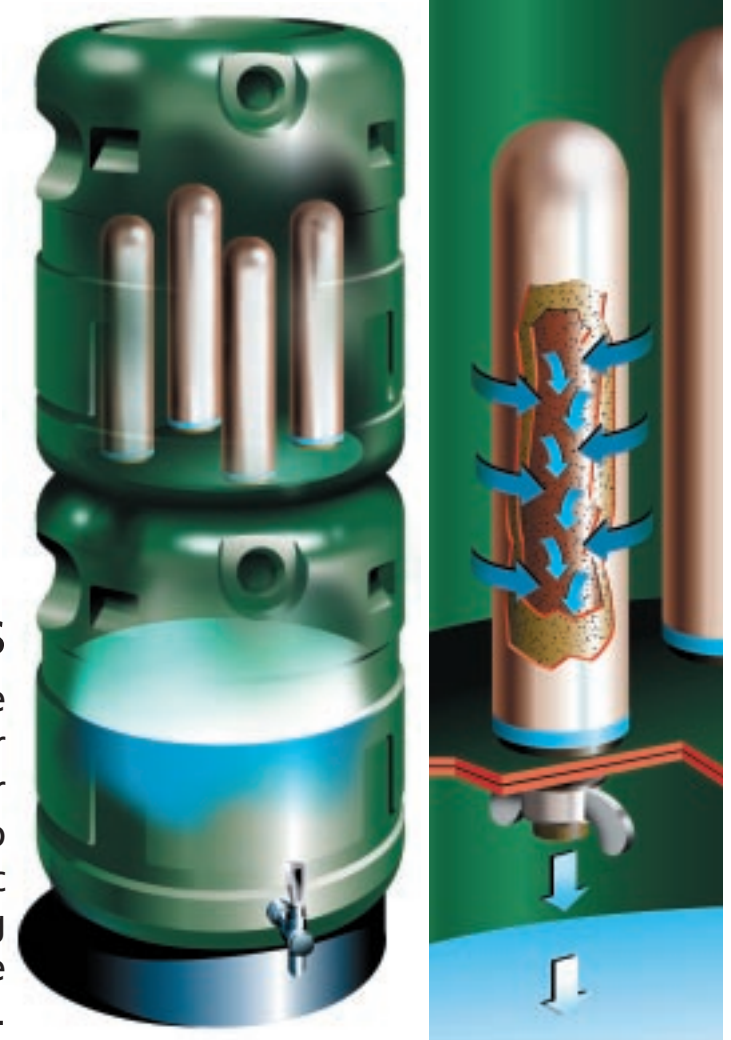

Solar units

With the provision of low cost solar panel units, enough electricity can be stored to power lighting & small appliances. Additional panels can be fitted to provide even further power for such appliances as TVs etc.

Water units

Water storage barrels can be supplied complete with water filtration cartridges. Water collected, is filtered via the top barrel through the ceramic micro-porous cartridges removing bacterial contaminants to provide safe (potable) drinking water.
